3 No Pilkhana 2nd Lane, Howrah, WB | English, Hindi

PROFESSIONAL SUMMARY

BCA graduate (8.2 CGPA) and hands-on builder of AI-powered tools in Python, with project experience in LLM/generative AI API integration (Gemini, OpenAI), prompt engineering, REST API workflows, and automation. Built three GitHub-hosted projects: a document Q&A assistant, a social media content automation platform, and an AI coding assistant with GitHub integration and automated tests. Completed professional training in Data Analytics with Generative AI at Anudip Foundation Centre of Excellence, Kolkata. Seeking an AI & Technology Internship to build practical AI tools, automated workflows, and AI-assisted applications.

EDUCATION

BCA — George College (MAKAUT) 2025 | CGPA: 8.2
Class XII (HSC) — Maheshwari Balika Vidyalaya, WB 2022
Class X (SSC) — Salkia Vikram Vidyalaya 2020

PROJECTS

AI Coding Assistant | Python, LLM, OpenAI API, GitHub, AI-Assisted Development

- Built an AI-powered coding assistant that generates code explanations, identifies potential errors, suggests improvements, and assists with debugging using LLM APIs (OpenAI / Gemini).
- Combined fast AST-based static checks with an LLM review pass, and integrated GitHub to fetch and review files and pull request diffs by URL; covered with 21 automated tests.

AI Social Media Content Automation Platform | Python, GenAI, REST API, Automation, Prompt Engineering

- Built a Python automation tool that generates captions, hashtags, content ideas, and short-video scripts through generative AI APIs, reducing manual content creation effort.
- Designed platform-aware prompt templates (Instagram, TikTok, LinkedIn, etc.), CSV batch automation, and a content-calendar generator with retry handling for API calls.

AI-Powered Document Q&A Assistant | Python, Generative AI, LLM, Prompt Engineering, API

- Developed a Python application where users upload documents (PDF, DOCX, TXT) and ask natural-language questions; relevant passages are retrieved and passed to an LLM to generate grounded answers.
- Integrated AI APIs and designed an interactive question-answering workflow with prompts that keep answers tied to the document context.

EXPERIENCE

Web Development Intern — Euphoria GenX Jun 2024 – Aug 2024

- Worked on front-end development tasks under set timelines, requiring careful problem-solving and attention to detail.
- Collaborated with a remote team, following defined standards and incorporating feedback quickly.

Data Analytics with Generative AI — Anudip Foundation Centre of Excellence, Kolkata

- Completed hands-on professional training in Python, SQL, Excel, and Power BI; practiced data cleaning, transformation, and analysis using Pandas and NumPy.
- Applied core Generative AI concepts to real-world use cases.

TECHNICAL SKILLS

AI & Automation: Generative AI, LLM API Integration (Gemini, OpenAI), Prompt Engineering, AI-Assisted Development & Debugging, NLP, Workflow Automation

Languages & Backend: Python, SQL (MySQL), FastAPI, REST API Integration

Dev Tools: Git, GitHub, pytest, VS Code, Streamlit

Other: Pandas, NumPy, Power BI, Excel, React.js, JavaScript, HTML/CSS

Strengths: Analytical Problem-Solving, Fast Debugging, Communication, Teamwork, Adaptability
